

ENVIRONMENTAL POLICY

At LIVAR d. d., our guiding principle is that we shall at all times care for our living and working environment, and that the impacts on the environment resulting from our activities are within legally prescribed and other requirements. We shall endeavour to reduce these impacts to the lowest possible level.

This can be achieved by observing the following principal guidelines:

CONTINUOUS OBSERVATION AND IMPLEMENTATION OF ENVIRONMENTAL LEGISLATION AND OTHER REGULATIONS AND REQUIREMENTS

related to environmental management and our activities, and the fulfilment of requirements of local communities in areas where a specific site is located;

PREVENTION OF POLLUTION AND EXTRAORDINARY EVENTS

by ensuring constant supervision and continuous improvement of our processes;

CONCERN FOR A CLEAN AND SOUND ENVIRONMENT

by implementing new technologies according to the requirements of reference documents, with regular maintenance of equipment and assurance of proper functioning;

RATIONAL USE OF NATURAL RESOURCES

electric power, raw materials, water ...

RECYCLING

recovery of heat (heating) and wastes;

CONCERN FOR OUR WASTES

by reducing their creation in our processes and preparing sites for their safe disposal.

It is important that all employees of LIVAR d. d., our suppliers and all those working on behalf of LIVAR d. d. are aware of how they can favourably and unfavourably affect the environment through their work, and how these impacts can be reduced.

Our environmental policy is always available for inspection to all interested parties (the public).

The management of LIVAR d. d. will regularly monitor the preparation and implementation of all planned activities aimed at the realization of goals and programmes, as well as support and encourage an awareness for continuous improvement and the reduction of environmental pollution.

Ivančna Gorica, 1st January 2015

Jože Kaligaro, MSc

Chief Executive Officer, LIVAR d. d.
